

Lovely Professional University, Punjab

Course Code	Course Title	Lectures	Tutorials	Practicals	Credits	
INT373	AGILE DRIVEN DEVELOPMENT AND PROJECT MANAGEMENT	2	0	2	3	
Course Weightage	ATT: 5 CA: 25 MTT: 20 ETT: 50					
Course Focus	EMPLOYABILITY,ENTREPRENEURSHIP,SKILL DEVELOPMENT					

Course Outcomes :Through this course students should be able to

CO1 :: explain the principles and values of Agile methodologies and the roles, ceremonies, and artifacts in the Scrum framework.

CO2 :: understand the roles and responsibilities within an Agile team and the importance of cross-functional collaboration and effective communication

CO3 :: apply Agile practices to simulate an Agile environment, including backlog management, Scrum ceremonies, and customer-centric product development

CO4 :: apply Agile engineering techniques to improve code quality and collaboration

CO5 :: analyze frameworks for scaling Agile to large teams and identify strategies for addressing challenges in distributed Agile projects

CO6 :: analyze product management strategies to enhance product quality and value delivery

	TextBooks (T)		
Sr No	Title	Author	Publisher Name
T-1	SUCCEEDING WITH AGILE: SOFTWARE DEVELOPMENT USING SCRUM	MIKE COHN	PEARSON

	Reference Books (R)		
Sr No	Title	Author	Publisher Name
R-1	ESSENTIAL SCRUM: A PRACTICAL GUIDE TO THE MOST POPULAR AGILE PROCESS	KENNETH S. RUBIN	ADDISON-WESLEY
R-2	SOFTWARE PROJECT MANAGEMENT	BOB HUGHES, MIKE CORETELL AND RAJIB MALL	MCGRAW HILL EDUCATION
R-3	HANDS-ON AGILE SOFTWARE DEVELOPMENT WITH JIRA: DESIGN AND MANAGE SOFTWARE PROJECTS USING THE AGILE METHODOLOGY	DAVID HARNED	PACKT PUBLISHING

Other Reading (OR)		
Sr No	Journals articles as Compulsary reading (specific articles, complete reference)	
OR-1	The Lean Startup by Eric Ries ,	
OR-2	Extreme Programming Explained: Embrace Change by Kent Beck ,	
OR-3	Harvard Business Review:- Case studies on Agile in large-scale enterprises. ,	
OR-4	Comparative Study of Agile vs. Traditional Project Management ,	
OR-5	Optimizing Scrum Ceremonies: Insights from Industry Practices ,	
OR-6	Impact of Scrum Board Tools (Jira vs. Trello) on Agile Team Efficiency ,	
Relevant Websites (RW)		
Sr No	(Web address) (only if relevant to the course)	Salient Features

An instruction plan is only a tentative plan. The teacher may make some changes in his/her teaching plan. The students are advised to use syllabus for preparation of all examinations. The students are expected to keep themselves updated on the contemporary issues related to the course. Upto 20% of the questions in any examination/Academic tasks can be asked from such issues even if not explicitly mentioned in the instruction plan.

Software/Equipments/Databases		
Sr No	(S/E/D) (only if relevant to the course)	Salient Features
SW-1	Burndown Charts in Jira	Jira has built-in charts to track velocity and burndown
SW-2	Cycle Time Analytics in GitHub	GitHub Insights provides data for Agile metrics like cycle time

LTP week distribution: (LTP Weeks)	
Weeks before MTE	7
Weeks After MTE	7
Spill Over (Lecture)	4

Detailed Plan For Lectures

Week Number	Lecture Number	Broad Topic(Sub Topic)	Chapters/Sections of Text/reference books	Other Readings, Relevant Websites, Audio Visual Aids, software and Virtual Labs	Lecture Description	Learning Outcomes	Pedagogical Tool Demonstration/ Case Study / Images / animation / ppt etc. Planned	Live Examples
Week 1	Lecture 1	Introduction to Agile Methodologies(Agile principles and values)	T-1 R-3	OR-2 RW-3	Zero lecture for the introduction to the course objectives, structure and details of academic tasks introduction of Agile	Student will know about basics of Agile	PPT & Talk (Discussion Classroom Lecture using chalk and talk technique)	
	Lecture 2	Introduction to Agile Methodologies(roles)	T-1 R-1 R-2	RW-1 RW-2	Explain Scrum roles (PO, SM, Team), ceremonies (Sprint Planning, Retrospective), and artifacts (Backlog, Increment)	Define and differentiate key Agile roles, ceremonies, and artifacts.	PPT & Talk (Discussion Classroom Lecture using chalk and talk technique)	Conduct a mock Sprint Planning session between students in class
		Introduction to Agile Methodologies(ceremonies)	T-1 R-1 R-2	RW-2 RW-10	Explain Scrum roles (PO, SM, Team), ceremonies (Sprint Planning, Retrospective), and artifacts (Backlog, Increment)	Define and differentiate key Agile roles, ceremonies, and artifacts.	PPT & Talk (Discussion Classroom Lecture using chalk and talk technique)	Conduct a mock Sprint Planning session between students in class

Week 1	Lecture 2	Introduction to Agile Methodologies(artifacts)	T-1 R-1 R-2	RW-10	Explain Scrum roles (PO, SM, Team), ceremonies (Sprint Planning, Retrospective), and artifacts (Backlog, Increment)	Define and differentiate key Agile roles, ceremonies, and artifacts.	PPT & Talk (Discussion Classroom Lecture using chalk and talk technique)	Conduct a mock Sprint Planning session between students in class
Week 2	Lecture 3	Introduction to Agile Methodologies(Comparison between Agile and traditional project management)	T-1 R-2	OR-4	Compare Agile methodologies with Waterfall and traditional models	Recognize the advantages of Agile over traditional models in dynamic environments.	PPT & Talk (Discussion, Reallife problems, Classroom Lecture using chalk and talk technique)	
	Lecture 4	Overview of Scrum framework(setting up a Scrum board and backlog (using tools like Jira or Trello))	T-1 R-1 R-3	OR-6 RW-11	Introduction to Scrum concepts and practices, setting up a Scrum board and backlog using tools.	Learn the basics of Scrum and understand backlog creation	Live Demonstration (using tool Like Jira or trello (Cognitive learning and Use of project work(Term paper allocation)))	Jira or Trello Example show in class
Week 3	Lecture 5	Overview of Scrum framework(Daily standup and retrospective)	T-1 R-1 R-3	RW-4	Explain the importance and structure of daily standup meetings and retrospectives	Conduct effective standups and retrospectives for continuous improvement	Role play and Live Demonstration	Conduct a simulated daily standup for a team scenario
	Lecture 6	Agile Team Dynamics and Collaboration(Building and managing cross-functional teams)	T-1 R-1 R-3	OR-5	Importance of cross-functional teams in Agile; how to foster collaboration and communication	Learn techniques to build and manage cross-functional teams	PPT & Talk (Discussion, Reallife problems, Classroom Lecture using chalk and talk technique)	
Week 4	Lecture 7	Agile Team Dynamics and Collaboration(different roles in an Agile team, Product Owner, Scrum Master)	R-1	RW-9 RW-12	Detailed discussion of the Product Owner, Scrum Master, and Development Team roles.	Understand the responsibilities and collaboration among Agile roles.	Role play , Team Activity	Role-playing exercise for each Agile role
	Lecture 8	Role of Product Manager in Agile Development (Effective communication and conflict resolution within Agile teams)	T-1 R-1	RW-8	verview of the Product Manager's responsibilities and Techniques for communication and resolving conflicts within Agile teams	Understand how Product Managers contribute to Agile projects and enhance team communication and conflict management skills	PPT & Talk (Discussion, Reallife problems, Classroom Lecture using chalk and talk technique)	Practice scenarios for resolving team conflicts

Week 5	Lecture 9	Role of Product Manager in Agile Development(Team-based exercises to simulate cross-functional collaboration)	T-1 R-1	RW-8	Simulate cross-functional collaboration through team-based exercises.	Develop collaboration skills for Agile environments.	PPT & Talk (Brainstorming (Project planning), Real-life problems allow reflection time, and Analysis of critical incidents originating in familiar and nonfamiliar situations)	Conduct a cross-functional collaboration exercise with role playing excercise
		Role of Product Manager in Agile Development(Role-playing exercises for Product Owner, Scrum Master and team roles)	T-1 R-1	RW-12	Simulate cross-functional collaboration through team-based exercises.	Develop collaboration skills for Agile environments.	PPT & Talk (Brainstorming (Project planning), Real-life problems allow reflection time, and Analysis of critical incidents originating in familiar and non familiar situations)	Conduct a cross-functional collaboration exercise with role playing excercise
	Lecture 10	Introduction to Project Management in Agile (Product Manager in Agile)	T-1 R-1 R-2 R-3	RW-12	Explore Agile project lifecycle stages and road map creation techniques and Explore customer centric approach in Agile	Learn to develop product road maps and understand lifecycle stages	PPT & Talk (Discussion, Reallife problems, Classroom Lecture using chalk and talk technique)	
		Introduction to Project Management in Agile (Project life cycle and road map development)	T-1 R-1 R-2 R-3	OR-1	Explore Agile project lifecycle stages and road map creation techniques and Explore customer centric approach in Agile	Learn to develop product road maps and understand lifecycle stages	PPT & Talk (Discussion, Reallife problems, Classroom Lecture using chalk and talk technique)	
		Introduction to Project Management in Agile (Customer-centric product development)	T-1 R-1 R-2 R-3	OR-3	Explore Agile project lifecycle stages and road map creation techniques and Explore customer centric approach in Agile	Learn to develop product road maps and understand lifecycle stages	PPT & Talk (Discussion, Reallife problems, Classroom Lecture using chalk and talk technique)	
	Lecture 11	Backlog management and prioritization techniques (MoSCoW and WSJF)	T-1 R-3	RW-14	Techniques like MoSCoW and WSJF for managing and prioritizing backlogs	Apply backlog management techniques to prioritize product features	PPT & Talk (Discussion, Reallife problems, Classroom Lecture using chalk and talk technique)	
Week 6	Lecture 12				Test- Situation based problem solving			

Week 7	Lecture 13	Backlog management and prioritization techniques (Creating a product road map and prioritizing the backlog)	T-1 R-1 R-3	RW-15	understand Product roadmap and study about case studies	Student will have better understanding of product	PPT & Talk (Case study examples)	Case Study
		Backlog management and prioritization techniques (Case studies on customer-centric development in Agile)	T-1 R-1 R-3	RW-15	understand Product roadmap and study about case studies	Student will have better understanding of product	PPT & Talk (Case study examples)	Case Study
		SPILL OVER						
Week 7	Lecture 14				Spill Over			
		MID-TERM						
Week 8	Lecture 15	Agile Engineering Practices (Test-Driven Development (TDD) and Behavior-Driven Development (BDD))	R-1 R-3	RW-5 SW-1	Explain TDD and BDD principles with simple coding example	Understand the importance of test driven and behavior driven development	Live Demonstration (Using Coding Platforms)	
	Lecture 16	Agile Engineering Practices (Test-Driven Development (TDD) and Behavior-Driven Development (BDD))	R-1 R-3	RW-5 SW-1	Explain TDD and BDD principles with simple coding example	Understand the importance of test driven and behavior driven development	Live Demonstration (Using Coding Platforms)	
Week 9	Lecture 17	Agile Engineering Practices (Pair programming and continuous integration)	R-1 R-3	SW-2	Importance of pair programming and CI in Agile; practice coding in pairs	Learn techniques for pair programming and CI in Agile projects	Live Demonstration (Using Peer Programming)	
	Lecture 18	Agile metrics(Velocity)	R-2 R-3		Explanation and use of Agile metrics to track progress and performance and Practice tracking Agile metrics using project management tools like Jira	Student will learn how to track and analyze team performance through Agile metrics	PPT & Talk (Discussion, Brain storming, Real life problems, Classroom Lecture using chalk and talk technique)	
		Agile metrics(burndown)	R-2 R-3		Explanation and use of Agile metrics to track progress and performance and Practice tracking Agile metrics using project management tools like Jira	Student will learn how to track and analyze team performance through Agile metrics	PPT & Talk (Discussion, Brain storming, Real life problems, Classroom Lecture using chalk and talk technique)	

Week 9	Lecture 18	Agile metrics(cycle time)	R-2 R-3		Explanation and use of Agile metrics to track progress and performance and Practice tracking Agile metrics using project management tools like Jira	Student will learn how to track and analyze team performance through Agile metrics	PPT & Talk (Discussion, Brain storming, Real life problems, Classroom Lecture using chalk and talk technique)	
		Agile metrics(Using Agile metrics in project management tools to track progress)	R-2 R-3		Explanation and use of Agile metrics to track progress and performance and Practice tracking Agile metrics using project management tools like Jira	Student will learn how to track and analyze team performance through Agile metrics	PPT & Talk (Discussion, Brain storming, Real life problems, Classroom Lecture using chalk and talk technique)	
Week 10	Lecture 19	Agile metrics(Hands-on exercises in TDD and BDD using simple coding projects)	R-2	RW-6	Student will perform some exercise on TDD and BDD	Student will learn more about these approaches	PPT & Talk (Discussion, Brain storming, Real life problems, Classroom Lecture using chalk and talk technique)	
		Agile metrics(Pair programming practice with peer evaluations)	R-2	RW-7	Student will perform some exercise on TDD and BDD	Student will learn more about these approaches	PPT & Talk (Discussion, Brain storming, Real life problems, Classroom Lecture using chalk and talk technique)	
	Lecture 20	Scaling Agile in Large Projects(Introduction to Scaling Agile frameworks)	R-3	RW-13	Overview of scaling frameworks: SAFe, LeSS, Scrum@Scale	Understand principles and frameworks for scaling Agile in large projects	Video & PPT (Brainstorming, Discussion method, discussion on Scrum@scale in frameworks)	
		Scaling Agile in Large Projects(SAFe)	R-2 R-3		Overview of scaling frameworks: SAFe, LeSS, Scrum@Scale	Understand principles and frameworks for scaling Agile in large projects	Video & PPT (Brainstorming, Discussion method, discussion on Scrum@scale in frameworks)	

Week 10	Lecture 20	Scaling Agile in Large Projects(LeSS)	R-2 R-3		Overview of scaling frameworks: SAFe, LeSS, Scrum@Scale	Understand principles and frameworks for scaling Agile in large projects	Video & PPT (Brainstorming, Discussion method, discussion on Scrum@scale in frameworks)	
		Scaling Agile in Large Projects(Scrum@Scale)	R-2 R-3		Overview of scaling frameworks: SAFe, LeSS, Scrum@Scale	Understand principles and frameworks for scaling Agile in large projects	Video & PPT (Brainstorming, Discussion method, discussion on Scrum@scale in frameworks)	
Week 11	Lecture 21	Scaling Agile in Large Projects(Agile practices for distributed and large teams)	T-1 R-1 R-2		Challenges and best practices for managing distributed Agile teams	Manage distributed Agile teams effectively	Live Demonstration and role play(Use case study and Distributed environments)	
		Scaling Agile in Large Projects(Challenges and best practices for scaling Agile in enterprises)	T-1 R-1 R-2		Challenges and best practices for managing distributed Agile teams	Manage distributed Agile teams effectively	Live Demonstration and role play(Use case study and Distributed environments)	
	Lecture 22	Scaling Agile in Large Projects(Creating and managing a scaled Agile setup using tools)	T-1 R-1 R-2 R-3	RW-2 SW-1	Using tools and frameworks to simulate scaled Agile projects	Apply scaled Agile frameworks in simulated environments	Live Demonstration (Using tool)	
		Scaling Agile in Large Projects(Group projects simulating distributed Agile teams)	T-1 R-1 R-2	RW-1 RW-2	Using tools and frameworks to simulate scaled Agile projects	Apply scaled Agile frameworks in simulated environments	Live Demonstration (Using tool)	
Week 12	Lecture 23	Advanced Product Management in Agile (Product strategy and market fit analysis)	T-1 R-1 R-3	RW-5	Techniques for conducting market fit analysis and developing product strategies	Align product strategies with market needs	PPT & Talk (Discussion, Brain storming, Real life problems, Classroom Lecture using chalk and talk technique)	

Week 12	Lecture 24	Advanced Product Management in Agile(Data-driven product decisions and A/B testing)	T-1 R-2		Importance of data driven decisions and A/B testing in Agile projects	Use data to make informed product decisions	Live Demonstration (Discuss different testing environments)	
Week 13	Lecture 25	Advanced Product Management in Agile (Managing technical debt in Agile projects)	R-2 R-3	RW-4 RW-5	Strategies for identifying and managing technical debt in Agile projects	Analyze and refactor code to manage technical debt effectively	PPT & Talk (Discussion, Brain storming, Real life problems, Classroom Lecture using chalk and talk technique)	
	Lecture 26	Advanced Product Management in Agile (Conducting a market fit analysis using case studies)	T-1 R-1 R-3	RW-2 RW-5	Study examples of advanced product management techniques in Agile organizations	Learn from real world applications of Agile in product management	PPT & Talk (Discussion, Real life problems, Classroom Lecture using chalk and talk technique, discuss case studies)	
		Advanced Product Management in Agile (Running A/B testing simulations for product decisions)	T-1 R-1 R-3	RW-5 SW-2	Study examples of advanced product management techniques in Agile organizations	Learn from real world applications of Agile in product management	PPT & Talk (Discussion, Real life problems, Classroom Lecture using chalk and talk technique, discuss case studies)	
		Advanced Product Management in Agile (Analyzing technical debt in coding exercises and devising refactoring strategies)	T-1 R-1 R-3	RW-4 RW-13	Study examples of advanced product management techniques in Agile organizations	Learn from real world applications of Agile in product management	PPT & Talk (Discussion, Real life problems, Classroom Lecture using chalk and talk technique, discuss case studies)	
Week 14	Lecture 27	Advanced Product Management in Agile (Conducting a market fit analysis using case studies)	T-1 R-1 R-3	RW-2 RW-5	Study examples of advanced product management techniques in Agile organizations	Learn from real world applications of Agile in product management	PPT & Talk (Discussion, Real life problems, Classroom Lecture using chalk and talk technique, discuss case studies)	

Week 14	Lecture 27	Advanced Product Management in Agile (Running A/B testing simulations for product decisions)	T-1 R-1 R-3	RW-5 SW-2	Study examples of advanced product management techniques in Agile organizations	Learn from real world applications of Agile in product management	PPT & Talk (Discussion, Real life problems, Classroom Lecture using chalk and talk technique, discuss case studies)	
		Advanced Product Management in Agile (Analyzing technical debt in coding exercises and devising refactoring strategies)	T-1 R-1 R-3	RW-4 RW-13	Study examples of advanced product management techniques in Agile organizations	Learn from real world applications of Agile in product management	PPT & Talk (Discussion, Real life problems, Classroom Lecture using chalk and talk technique, discuss case studies)	
		SPILL OVER						
Week 14	Lecture 28				Spill Over			
Week 15	Lecture 29				Spill Over			
	Lecture 30				Spill Over			

Scheme for CA:

CA Category of this Course Code is:A0203 (2 best out of 3)

Component	Weightage (%)	Mapped CO(s)
Term paper	50	CO1, CO2, CO3, CO4, CO5, CO6
Test- Situation based problem solving	50	CO1, CO2
Test	50	CO1, CO2, CO3, CO4, CO5, CO6

Details of Academic Task(s)

An instruction plan is only a tentative plan. The teacher may make some changes in his/her teaching plan. The students are advised to use syllabus for preparation of all examinations. The students are expected to keep themselves updated on the contemporary issues related to the course. Upto 20% of the questions in any examination/Academic tasks can be asked from such issues even if not explicitly mentioned in the instruction plan.

Academic Task	Objective	Detail of Academic Task	Nature of Academic Task (group/individuals)	Academic Task Mode	Marks	Allotment / submission Week
Term paper	The objective of a term paper is to conduct in-depth research, critically analyze information, and present a well structured argument on a specific topic.	The rubrics are applicable as follows: Abstract:20%, Literature Review:30%, Research Methodology:40%, Conclusion:10%.	Individual	Online	30	2 / 12
Test	To test the subject knowledge of the students and provide opportunity to improve their CA performance in case of low marks or any missed CA	Subjective test covering syllabus from CA1 and CA2.	Individual	Offline	30	11 / 12
Test- Situation based problem solving	To test Knowledge of students based on principal and values and roles responsibilities in Agile.	Based on Agile methodologies and different role management in agile. (The test will consist of 4 scenario based questions, where 2 questions will be of 5 marks each and 2 questions will be of 10 marks each.)	Individual	Offline	30	5 / 6

List of suggested topics for term paper[at least 15] (Student to spend about 15 hrs on any one specified term paper)

Sr. No.	Topic
1	Comparative Study of Agile vs. Traditional Project Management: Impact on Team Dynamics and Project Success.
2	Optimizing Scrum Ceremonies: Insights from Industry Practices.
3	Impact of Scrum Board Tools (Jira vs. Trello) on Agile Team Efficiency
4	Cross-Functional Collaboration in Agile Teams: Best Practices for Building and Sustaining Effective Teams
5	The Role of the Product Manager in Agile vs. Traditional Teams: Bridging the Gap
6	Conflict Resolution Techniques for Agile Teams: Enhancing Collaboration and Communication
7	Effectiveness of Backlog Prioritization Techniques: A Case Study on MoSCoW and WSJF Models
8	Customer-Centric Development in Agile Projects: Measuring the Impact on Product Success
9	Designing Agile Product Roadmaps: Balancing Innovation and Customer Needs
10	Assessing the Impact of Test-Driven Development (TDD) on Code Quality in Agile Projects

An instruction plan is only a tentative plan. The teacher may make some changes in his/her teaching plan. The students are advised to use syllabus for preparation of all examinations. The students are expected to keep themselves updated on the contemporary issues related to the course. Upto 20% of the questions in any examination/Academic tasks can be asked from such issues even if not explicitly mentioned in the instruction plan.

11	Behavior-Driven Development (BDD) as a Collaborative Agile Practice: A Team Perspective
12	Using Agile Metrics (Velocity, Burndown, Cycle Time) for Predictive Analytics in Project Management
13	Challenges and Success Stories of Scaling Agile Frameworks: A Comparative Study of SAFe, LeSS, and Scrum@Scale
14	Best Practices for Managing Distributed Agile Teams in Large-Scale Projects
15	Data-Driven Product Decisions in Agile: The Role of A/B Testing and Market Fit Analysis

Detailed Plan For Practicals

Practical No	Broad topic	Subtopic	Other Readings	Learning Outcomes
Practical 1	List of Practicals	Setting Up a Scrum Board	OR-1 SW-1	Student will learn how to Setup a Scrum Board in JIRA
Practical 2	List of Practicals	Conducting Daily Standups	OR-5	Student will learn about the format of a daily Scrum standup
Practical 3	List of Practicals	Role-Playing Agile Team Dynamics	RW-2 RW-3	Simulate Agile team roles and responsibilities
Practical 4	List of Practicals	Backlog Prioritization Techniques	RW-14	Apply MoSCoW and WSJF techniques
Practical 5	List of Practicals	Test-Driven Development (TDD) Hands-On	RW-5 RW-6	Implement TDD principles in a coding exercise
Practical 6	List of Practicals	Behavior-Driven Development (BDD) Workshop	RW-13	Student will learn how to write and implement BDD scenarios
Practical 7	List of Practicals	Sprint Retrospective Exercise	OR-5	Conduct a retrospective session to analyze a sprint
Practical 8	List of Practicals	Check and test different agile metrics	SW-1 SW-2	Analyze velocity, burndown, and cycle time
Practical 9	List of Practicals	Pair Programming Practice	OR-2	Enhance collaboration and code quality
Practical 10	List of Practicals	Simulating Distributed Agile Teams	OR-3 RW-6 RW-7 SW-2	Experience the challenges of distributed Agile
Practical 11	List of Practicals	Scaling Agile Frameworks Simulation	RW-4 RW-5 RW-6	Explore SAFe, LeSS, and Scrum@Scale

Practical 12	List of Practicals	A/B Testing Simulation	OR-2 RW-13	Make data-driven product decisions
	SPILL OVER			
Practical 13	Spill Over
